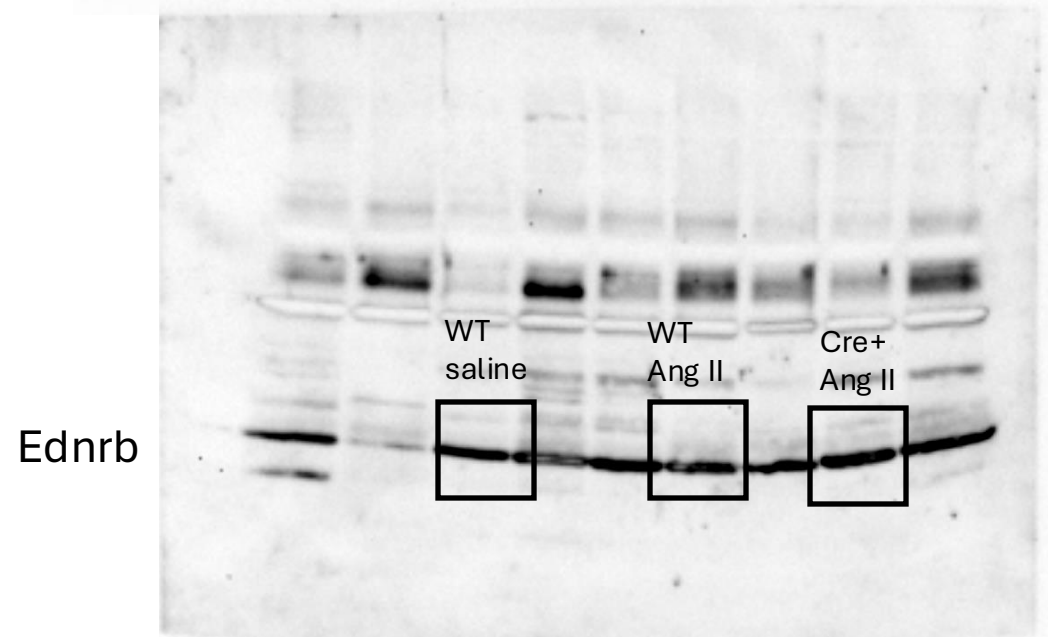

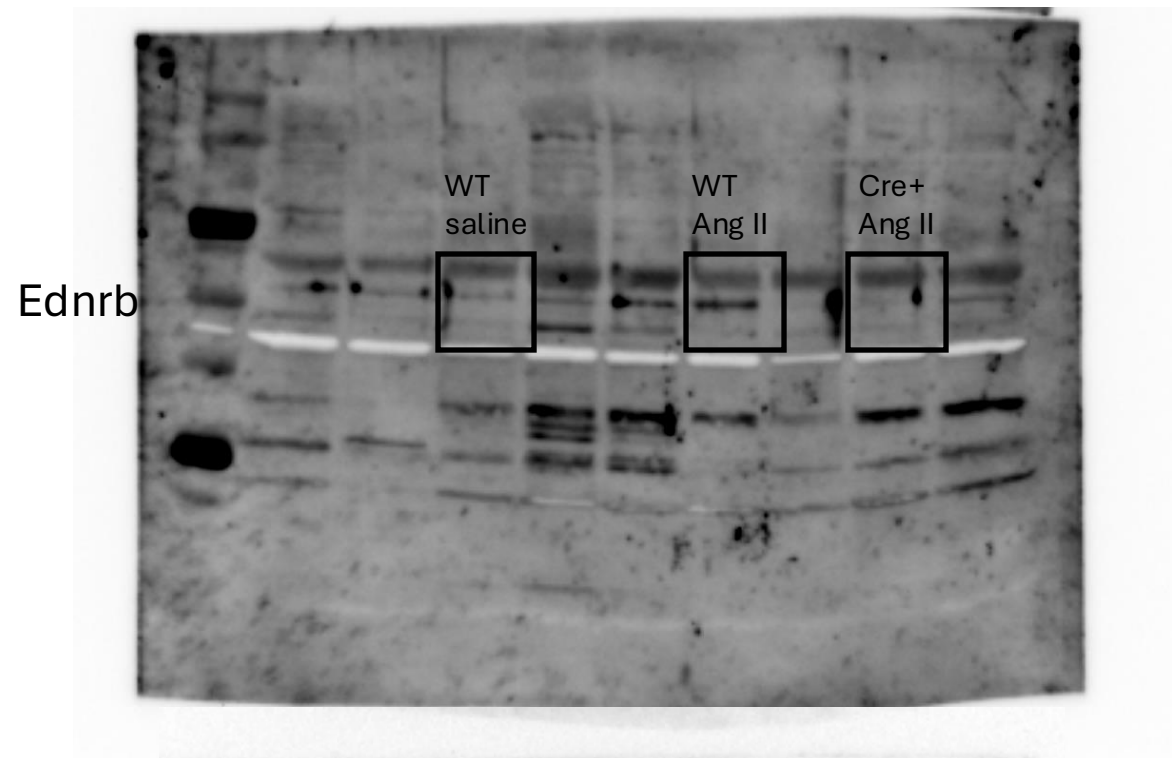

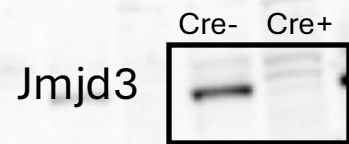

Figure 30

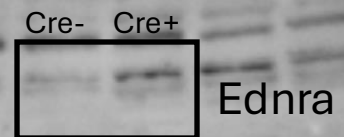

Jmjd3

Cre- Cre+

A Western blot image showing protein levels of Jmjd3. The blot has two lanes labeled 'Cre-' and 'Cre+'. A black rectangular box highlights the bands in both lanes, which appear to be of similar intensity.

Cre- Cre+

Ednra

A Western blot image showing protein levels of Ednra. The blot has two lanes labeled 'Cre-' and 'Cre+'. A black rectangular box highlights the bands in both lanes, which appear to be of similar intensity.

B-actin

Cre- Cre+

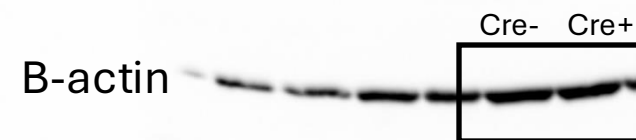

A Western blot image showing protein levels of B-actin. The blot has two lanes labeled 'Cre-' and 'Cre+'. A black rectangular box highlights the bands in both lanes, which appear to be of similar intensity.
